

1. Remove the components and make sure all pieces are present (Fig. 1).
2. Install the hour-hand (short one) of clock, second hand (middle one) and minute hand (longest one) by order. Adjust actual time while all of them are aim at 12 without lopsided (Fig. 2).
3. Remove the base and open the battery cover with three(3) batteries loaded. Please pay attention on positive electrode and negative electrode while loading the batteries (Fig. 3).
4. Insert the clock into the base and turn on the switch (Fig. 4).
